

# Valmet Slitter Holder Quick Change Adapter

for Beloit slitter sections

Valmet has developed a new slitter holder, the quick change holder, which makes changing slitters safer and easier. Slitter blade changes that used to take from 2 - 10 minutes can now be done in a fraction of the time. This technology is now available as a retrofit for Beloit slitter holders.

## Benefits

In addition to the speed and ease of blade change-out, and the safer blade handling, the quick change holder offers many more advantages:

- Reliable design for long service life
- Shear angle is machined into holder - no shimming or adjustment required
- Consistent slitting quality
- Fewer blade changes
- Reduced dusting
- Easy to maintain

## Simplify slitter performance

The quick change slitter holder can come complete with the adapter, ready to just swap in for your existing Beloit slitter holder:

- Disconnect the air supply
- Install the new quick change slitter holder with adapter block
- Reconnect the air supply
- Align and adjust for operation... and you're ready to go!

*Exchanging your existing Beloit slitter holder for a new quick change slitter holder is easy.*

*Just call your local Valmet representative for details.*

## Improve customer roll quality

Slitter Management was invented by Valmet over a decade ago and brings slitting best practices to your winder. Our program provides the training and resources you need to improve customer roll quality and productivity at your winder.

Use of Slitter Management considerably reduces maintenance costs of the winder, extending slitter blade life and blade change intervals, thus improving slitting performance. More effective winder operation improves productivity of the entire line.
