

Valmet Slitter Services Blade Pool

Keep your slitter blade supply sharp and ready.

The best winding operation can be brought to a screeching halt when you run out of sharp blades. Either you make poor shipping rolls - or stop production. Not a pleasant choice.

Stressing out about slitting?

Ever worry about having enough blades on hand for the weekend? Do your operators hide blades in their locker to make sure they always have sharp blades? Are you trying to figure out how to purchase the inventory needed to upgrade material? Ever need to get an emergency purchase order to purchase blades because you were almost out? Are your customers demanding better quality from your rolls?

With Blade Pool you can relax

Valmet understands how expensive it is to upgrade your quality to meet the demands of your customers. That is why Valmet has introduced the Valmet Slitter Services Blade Pool service, to allow you to operate with fewer blades. You can even lease blades from Blade Pool to eliminate the huge upfront cost of building a new inventory.

Blade Pool is about reducing stress. No more operators hiding blades in their locker. No more scrambling for purchase orders on a Friday afternoon. No need to call and put a rush on your blades - because they are always sharp and on our shelf awaiting their next assignment.

Improve customer roll quality

Valmet's Slitter Management services bring slitting best practices to your winder. Our services and technology include state-of-the-art blade design and materials, sharpness techniques and comprehensive OEM slitter section training.

Use of Slitter Management considerably reduces maintenance costs of the winder, extending slitter blade life and blade change intervals, thus improving slitting performance. More effective winder operation improves productivity of the entire line. We provide the training and resources you need to improve customer roll quality and productivity at your winder.
