

Valmet Slitter Services

Slitter unit repair service for Beloit holders

There's nothing worse than having a part go bad on your slitter assembly, taking it out of service. Why worry about tracking separate parts and pieces when you can easily replace the entire assembly?

Benefits

- Optimum slitting results
- Reduced dusting
- Reduced downtime
- Drop-in unit, ready to install
- **Full mechanical guarantee, OEM certified**

Simplify slitter performance

Contact Valmet for a Return Goods Authorization (RGA) number. Then simply send your slitter holder to Valmet and it will be swiftly repaired and returned to you as an OEM certified unit.

d. Bearing	VAL0087996
e. Clamp nut	STAAAY04087

Improve customer roll quality

Valmet's Slitter Management services bring slitting best practices to your winder. Our services and technology include state-of-the-art blade design and materials, sharpness techniques and comprehensive OEM slitter section training.

Use of Slitter Management considerably reduces maintenance costs of the winder, extending slitter blade life and blade change intervals, thus improving slitting performance. More effective winder operation improves productivity of the entire line. We provide the training and resources you need to improve customer roll quality and productivity at your winder.

Hub assembly

The task of maintaining Beloit slitters can be simplified by maintaining the hub assembly and clamp nut parts as a distinct separate assembly. It creates an easy way to account for the individual parts and allows quick installation with the hub assembly and blade in the slitter unit.
